

FoundationScreen

Uncover millions of dollars in new funding opportunities – from your existing donors

Screen your donors against:

- Over 380,000 US & 32,000 Canadian foundation directors & officers
- All newly registered foundations
- All first-time 990-PF tax filing foundations

Screen your donor and alumni lists against more than 400,000 Foundation directors and officers listed in FoundationSearch who control over \$600 billion in philanthropic assets.

Until now, prospect researchers have had no practical, easy way to identify which of their donors or alumni were directors or officers at over 80,000 US and Canadian foundations.

Now Metasoft brings you FoundationScreen, a new research screening service dedicated to helping your organization quickly and accurately identify unknown donors and alumni who control over \$600 billion in philanthropic assets.

FoundationScreen compares your donor and alumni database to the names and addresses of over 400,000 US and Canadian foundation directors and officers contained in Metasoft's FoundationSearch database. Spanning the years 1997 to 2003 — and beyond — FoundationSearch is the most comprehensive research product of its kind.

Stay on top of new funding opportunities. Over 6,000 new foundations, controlled by an estimated 35,000 directors and officers, are formed every year in North America. FoundationScreen's annual update service will keep your organization informed of new donor possibilities.

FoundationScreen Highlights:

- Segment donors and their foundations by city, area or country
- Advanced fuzzy search and screening technology ensures high match accuracy and low error rates
- Donor/alumni file delivered in any convenient flat file or database format
- Screened files are returned in the format specified — data fields include all the original data plus matched foundation names, addresses, total assets, total revenue and 990-PF filing year
- Optional annual update service available
